Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2410

Trojan is the reason my family gained economic stability and a middle-class status. Both my parents worked at Trojan and my dad made a career at PGE thanks to him getting hired on at the nuclear power plant. There's no doubt in my mind that a similar benefit should occur in Umatilla County for other families needing a leg up. Trojan was safe and clean and great for Rainier's economic prosperity. I hope Umatilla County enjoys the benefits of advances in nuclear power that Oregon's been deprived of for so long because of uneducated alarmists who watch sensationalized propaganda rather than listen to the folks who work and live nuclear power. Measure 7 should be repealed anyways. Times have changed and the voter population is different. The fact this bill has bipartisan support shows that. Let's pass HB2410 and work toward getting rid of the moratorium altogether.
