Committee: House Committee On Behavioral Health and Health  
Care

Measure, Appointment or  
Topic: HB3439

My family almost exclusively sees Naturopathic Doctors for our healthcare needs. We trust them to offer the most natural, holistic and supportive modalities, with a strong leaning towards preventative measures. They are trained to treat root causes of sickness, rather than offer prescriptions to mask symptoms. After too many bad experiences, we have lost faith in conventional allopathic medicine. These Naturopathic physicians who support health should be treated and compensated fairly. They should be equally represented in insurance networks.
