

Submitter: Savannah Harkleroad
On Behalf Of:
Committee: House Committee On Climate, Energy, and Environment
Measure, Appointment or Topic: HB2038

Several of my older relatives worked at Trojan. It was safe and stable employment for them. Three decades of nuclear power prohibitions is long enough considering the technological advances, the growing energy need and the younger generations who now make up Oregon's largest populations (we didn't get to vote in 1980 on Measure 7, we weren't even born yet).
