Committee:	House Committee On Behavioral Health and Health Care
Measure, Appointment or Topic:	HB3439

Naturopathic doctors are a crucial part of my health care. They have helped me get to the root of chronic issues that had gone unsolved for decades. Without this kind of support, I would still be suffering unnecessarily and unable to function in my daily life. If they are not reimbursed appropriately, then their services become harder to afford. I need them to be reimbursed at a more equitable rate like medical doctors and professionals so that this kind of care remains accessible.
