

## Why Reparations Are Fundamentally Flawed

### ✓ Selective Justice Ignores Other Historical Sacrifices

- If the argument is that **past injustices require compensation today, then why not compensate the families of those who fought and died to end slavery?**
- **Union soldiers gave their lives for the abolition of slavery—should their descendants not receive reparations for their loss?**

### ✓ Reparations Undermine the Core Principle of Individual Responsibility

- The Republic was built on the principle that **individuals are not guilty or responsible for the actions of their ancestors.**
- **Reparations assign collective guilt to one group and collective victimhood to another, fueling resentment instead of unity.**

### ✓ Endless Claims for Historical Grievances

- If reparations are justified for African Americans, then what about **Irish indentured servants, Japanese internment victims, Native Americans, and others who suffered injustices?**
- At what point does the cycle of compensation end?

### ✓ Americans Have Already Paid the Price

- **The Civil War itself was the payment—600,000 lives lost, the South devastated, and the economy rebuilt.**
- **The U.S. has spent trillions on welfare, affirmative action, and social programs aimed at addressing racial disparities.**

---

## Bottom Line

- 🚨 **Reparations ignore the sacrifices made by Union soldiers and their descendants.**
- 🚨 **They promote collective guilt and division instead of fostering national unity.**
- 🚨 **If past wrongs justify reparations, where does it stop? Should every group demand compensation for historical grievances?**

**The real solution isn't handouts—it's preserving the Republic and ensuring equal opportunity for all, regardless of ancestry.**
