

Submitter: Jan Zuckerman

On Behalf Of:

Committee: House Committee On Emergency Management, General Government, and Veterans

Measure, Appointment or Topic: HB2152

It doesn't take much to imagine what will happen when a disaster hits at the Critical Energy Infrastructure Hub where 90% of our state's liquid fossils are stored. What happens when our first responders lose all access to fuel and areas are completely cut off from any energy and any help? Our state will not recover. HB 2152 provides an extensive actionable disaster fuel security plan- a lifeline for survival in this state. It also requires us to look at the necessity of transitioning from combustible fuels to other energy sources. We cannot afford to put this off. Please support HB 2152.
