I support SB 777. As a rancher and someone who is very involved with the cattle industry at the local and state levels I have seen first hand, the extensive negative effect that wolves have on all types of cattle herds. The financial loss reaches much farther than each single animal that is killed and our ranchers should receive compensation for the loss of not only that animal, but the potential calves that are also lost. They did not ask for these predators to be unleashed upon their ranges while their hands are tied and unable to protect their livestock and livelihood.
