

Submitter: Sue Mandeville

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2410

Allowing Umatilla county to install a nuclear "pilot project" is the same as letting them build a small nuclear reactor that no one, but Amazon and other AI data centers want. This is insane. Oregonians voted no on having nuclear reactors in Oregon and big corporations are trying to get around that law. To allow this to go through, is a betrayal of Oregonians. The nuclear industry does not have a good reputation, small reactors/pilot projects are still nuclear and come with all the dangers of nuclear radiation, cost and the devastating consequences of accidents. This should be enough for anyone with a lick of sense to vote no on this bill.
