

Submitter: Jim Scheppke

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2038

Chair Lively and Members of the Committee:

I am strongly opposed HB 2038. What is being proposed is not an unbiased study. It calls for a study of "advantages" when it is well known that there are many disadvantages to nuclear energy. That's why Oregonians decided a long time ago that we didn't want it in our state. Let's keep it that way. The Oregon Department of Energy has much better uses for its staff time and budget than to study what has been obvious to Oregonians for a long time.
