

Submitter: Richard Wisner

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2410

26 February 2025

House Committee on Climate, Energy and Environment
House Bill 2410

Dear Chair Representative Lively, Vice-Chairs Representatives Gamba and Levy and members of the Committee:

For the sake of all Oregonians, present and future, I urge you to pass HB 2410. The time is far past to seriously consider Small Modular Reactors as a safe, environmentally passive, economical energy source.

As you know, Oregon's demand for energy is not getting less and less as time goes by. Nor will it ever stop increasing. Also, as time goes by, it is becoming more apparent to more people that relying solely on so-called "green energy"—wind, wave & solar—in particular, are going to be able to meet our growing demand.

House Bill 2410 is a step in the right direction to assure Oregon meets her energy demands in the years ahead. Take that step.

For all of us, pass Senate Bill 2410

It's the right thing to do.

Thank you,

Richard Wisner
