

Submitter: David Shaw

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2410

Dear House Committee on Climate, Energy, and the Environment

Please do not vote for HB 2038 and HB 2410! Oregon has opposed nuclear energy for decades. Other sustainable energy sources are much cheaper and do not have the dangers of nuclear waste.

These bills bypass the statewide will of the people as expressed in the 1980 ballot measure. There is still no safe storage for nuclear waste. Small Modular Nuclear Reactors are unproven technologies. Oregon should not be the place to gamble on exploring or developing these technologies.

If Umatilla County were to adopt this technology nuclear waste would still be transported across other Oregon counties.

Sincerely Yours,

David A. Shaw
