

Submitter: Emily Hubert

On Behalf Of:

Committee: House Committee On Education

Measure, Appointment or Topic: HB3063

I support HB 3063, in my professional role I support students transitioning from hospitalization back into school. If a student is hospitalized for an extended amount of time and engaging in treatment that keeps them physically out of school for an extended period of time, it is crucial for this student to continue connection with their home district. With each change to a new school system/district/online program there is opportunity for a disconnection and disruption in attendance and enrollment. On top of the amount of communication needed for medical reasons. If a student is allowed to stay connected to their home district, this communication can stay solid with their school team, which will promote the student's continued engagement in school.
