On Behalf Of: The Vocal Seniority
Committee: House Committee On Agriculture, Land Use, Natural
Resources, and Water
Measure, Appointment or Topic: HB2965

Dear House Committee On Agriculture, Land Use , Natural Resources and Water,

I'm writing to support HB 2965. It has been proven time and again that net pen farms are harmful to marine life including native salmon and steelhead. They were tried and eventually shut down in BC and Washington because it was proven that the spread diseases to many fish species and fouled the water. Our ifish should be treated as a natural resource not a commodity. These pens sacrifice local populations for the benefit of a few people who have no respect for our environment and native fish. please vote to support this bill.

Craig Lacy
