

Submitter: Jennifer Constantine

On Behalf Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and Water

Measure, Appointment or Topic: HB2965

Please SUPPORT HB 2965-5. The use of net pens that confine farmed fish allows for fish feed, fish feces, and pharmaceuticals to end up in our waterways. The havoc wreaked on our ecosystems when fish escape (which they do, often in massive numbers) threatens to overtake native fish and spread disease.

Oregonians everywhere are against causing environmental and economic harm. This bill is needed to protect water quality, native species, and our ability to keep our waterways economically and ecologically viable. Please vote yes.
