

Submitter: Elaine LAVINGTON

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB218

I support. The wind turbines have hurt the whales on the east coast. Birds have been killed from these wind farms as well. The wind turbines only work for so many years and then you have these big wind turbine wings from the wind turbines that are hard to dispose of. More studies need to be made in Oregon before this expensive alternative for power comes to Oregon. Let's protect our fish and birds in Oregon.
