Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2410

Having lived in Oregon since I was a child, I have seen first-hand how wonderful and safe nuclear power can be for our communities, big and small, with today's safety protocols and modern advancements to technology. I think Oregon would benefit if more well-ran, safe and secure nuclear facilities existed to meet all our power needs and once the lifetime of the plant is over, they'd make for excellent parks just like Trojan in Deer Island!
