

Submitter: Hope Harris

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2410

The majority of Oregonians do not want anything to do with nuclear power!! No SMNRs! Especially not to put our tax dollars to support the largest & richest corporations in the world Amazon & Google to power their data centers! Billions of dollars & more & more needed. A decade to build or more!! Considering I'm a believer in climate change & I hope you are too, we don't have time!!! Nuclear is definitely not the answer. If you don't believe in climate change or science & are supporting drilling for fossil fuels & supporting the billionaires then you'd consider more nuclear power. This is not acceptable! Just like what is going on with the self proclaimed king of our country- do you believe the lies? Nuclear power is the most costly energy producer. Most costly to build. To operate also. That in itself should turn you off. But it's so deadly and for millions of years so why would you want that? Oregonians say ?? NO!! No to any form of nuclear power. It's always been touted as the magic answer. The answer to our demise! With more waste, more accidents, more cancers, more deaths. Still no answer for the waste. We need CLEAN energy! Wind, solar, wave power not any more nukes in any form. Do not support this industry & the billionaires that are trying to sell you on it! Thank you.
