

Submitter: Rose Walker Patterson  
On Behalf Of:  
Committee: Senate Committee On Natural Resources and  
Wildfire  
Measure, Appointment or Topic: SB777

Wolves, and the evil human predators that secretly disperse them in rural communities, are extremely dangerous, aggressive, and have a sole purpose: seek and destroy. Transplanted wolves have killed our neighbor's livestock and have come up to the back porch of another neighbor's house. They have been seen very close to our herd, and of course, are often followed by the "little blue helicopter". Adjoining states not only pay reimbursement for depredation, but also have bounties on wolves, rightfully so. We fully support SB 777.
