

Submitter: Mike Mccallum  
On Behalf Of: Mike Mccallum and the people of the state of orego  
Committee: House Committee On Agriculture, Land Use, Natural  
Resources, and Water  
Measure, Appointment or Topic: HB2965

Clear and direct - net pen systems for raising fish commercially is not an environmentally sound practice for the Oregon coastal environment. Reasons include risk of release during storms, toxic dead zones, risk or virus in confined and concentrated nets and contributing to retide event migration. Simple put no net pen operation improved the environment within the effected areas adjacent to the pen location. Keep Oregon green and clean.
