Measure, Appointment or Topic:	HB2410

The current Presidential administration has no competent leadership and wants to de-regulate on behalf of the wealth. Now is not the time to take away the voice of Oregonians, considering the wealthy do not care what happens to the rest of us and are shoring up their bunkers because they know they are destroying United State's natural resources and human habitats. The small modular nuclear reactors will affect all Oregonians not just those living in Umatilla county.

Allowing the SMNR companies to provide their report on themselves is an example of Waste, Fraud, and Abuse (the call is coming from inside the SMNR company). The polluters have shown they only care about their profits; examples include Boeing, East Palestine train derailment, cancer alley Louisiana, our own electric utility companies not de-energizing powerlines causing horrific fires in communities that are still trying rebuild. Do not allow SMNR polluters to destroy Oregon's natural and limited resources.

Do not let Oregon become a dumping ground for nuclear waste and let Oregonians decide if they want to be a dump site for nuclear waste. Oregon's water is a precious resource, we should not be seeking ways to pollute our water or expend our water resources on small modular nuclear reactors or data centers. Oregon is expecting a large earthquake so the fallout from nuclear accident can be seen from Fukushima nuclear disaster.
