

Submitter: Jenna Hyde

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure, Appointment or Topic: HB3439

I believe in HB 3439 because naturopathic physicians provide support to their patients at a value equal to MD's, PA's, and NP's. Naturopathic care is there for people who don't feel traditional medicine has helped, who have experienced medical trauma and want a treatment plan that is not necessarily medication based. ND's are a vital part of a whole health approach and are imperative to healing for a large part of our communities. They deserve to be treated and compensated as such.
