

Submitter: Leslie Davis

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2679

I'm a landscape designer and contractor in Eugene and I fully support HB2679 to classify pesticides containing neonicotinoids as restricted use. There are safer options that keep people, plants, and most significantly, pollinators healthy. This bill is a smart step towards righting the damage that's impacted the decline of our state's valuable pollinators. Let's join the 12 other states that have already restricted neonicotinoids. Thank you.
