

Submitter: Bill Bold

On Behalf Of:

Committee: Senate Committee On Early Childhood and Behavioral Health

Measure, Appointment or Topic: SB702

I am not an expert on what ingredients are in these flavored tobacco products but I believe it is the carrier solvent and the nicotine itself that are the hazardous materials, not the flavors. You are in effect banning a non-hazardous material in order to indirectly ban one that is. Send this one back for a rewrite, there has to be a better way.
