Committee: House Committee On Agriculture, Land Use, Natural
Resources, and Water

Measure, Appointment or Topic: HB3103

I oppose this ridiculous bill for multiple reasons, the biggest being that it isn't prioritizing our future. Humans need the Earth, we need our wildlife, we need our trees, we need to use sustainable and reusable if we still want humans to be around and enjoying the Earth in future decades and centuries. It's easy to not care, and chop down acres of forest without caring about the vital wildlife, and that's what humans in the past have done, which has endangered our current lives. I, and many others, are asking and hoping you do the hard, and right, thing. Stop putting off or undermining the conservation plans that will save humanities future.

HB 3103 prevents ODF from implementing its Climate Change and Carbon Plan. HB 3103 also prioritizes timber harvest over other values on state forests, like protecting our fish, wildlife, clean water, and gorgeous scenery. Please don't continue to make the mistakes of the past our future.
