Committee: House Committee On Agriculture, Land Use, Natural
Resources, and Water

Measure, Appointment or Topic: HB3103

Hello,

I am a 15 year wildlife biologist and environmental scientist that has worked throughout the forests of Oregon. Much of my work has been in the older stands of trees with countless hours at all times of day and night traversing the wilderness alone. My time in our forests is matched by few. The value in these lands is its conservation. Turning a forest into a plantation of mono crop does not benefit Oregonians.
