Measure, Appointment or Topic: HB2679

The Oregon Dept of Ag has been hearing complaints about the egregious dangers of "neo-nics" for over 20 years.

Why is the State ALLOWING these dangerous toxins to be applied within the boundaries of the State of Oregon? These poisons do not belong anywhere near living organisms.

We don't want "neo-nics" regulated. We want a ban on neo-nics, a permanent ban on the production and distribution of these life-endangering toxins.

A permanent ban, never to be manufactured or applied ever again. These toxins have no place in Oregon's economy.
