

Submitter: Andrew Simrin

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3081

Incentives for efficiency can work to accelerate our energy and carbon reduction goals.

There's never been more financial help for Oregonians to upgrade their homes and buildings for better health, lower costs, less pollution, and higher resilience, yet finding and applying for all the incentives can be a challenge. This bill will build on the success of Oregon's new tool to find and combine incentives for homeowners, landlords, contractors and more.

Thank you.
