

Submitter: Andrew Simrin

On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure, Appointment or Topic: SB215

I oppose repealing the requirement that there be a responsible, licensed way to dispose of nuclear waste. There are many waste products from the process, and spent fuel/rods are still a danger for many years. Even with SMNRs there are still risks and waste products/biproducts that have no licensed disposal methods.

Thank you.
