

Submitter: Vincent Torres

On Behalf Of:

Committee: Senate Committee On Health Care

Measure, Appointment or Topic: SB951

When contract management groups start to use their influence to control how physicians and other medical practitioners practice medicine it negatively affects patients. Medical practitioners should be allowed to practice medicine without the influence from a contract management group. The providers should be allowed to move practices without financial constraints or practice area limitations. If allowed to do so, then it can negatively affect access to care and unbiased care to the community.
