

Submitter: annie capestany

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3081

I am a portland resident and i recently installed a heat pump. It is confusing getting the information necessary to make a smart decision. Climate change won't wait while we muddle through the process. Please help people get the information they need quickly so they can save money (we are paying less for methane, aka natural gas!), live more comfortably, and also help slow down climate change. Yes on HB 3081.
