

Submitter: Karen Murray

On Behalf Of:

Committee: House Committee On Climate, Energy, and  
Environment

Measure, Appointment or  
Topic: HB2038

As a retired science teacher and after listening to yesterday's hearing on 2038, I agree with some of the people who testified about providing the DISADVANTAGES along with the advantages of nuclear power, as part of the bill. Without a permanent repository for nuclear power waste that is safe, any new nuclear reactors should not be licensed in this country or state. This disadvantage overrides any advantage that nuclear power would provide.

Thank you for a chance to add testimony. Karen Gartland Murray
