

Submitter: David Babcock

On Behalf Of:

Committee: House Committee On Agriculture, Land Use, Natural
Resources, and Water

Measure, Appointment or Topic: HB3103

Please do not allow HB 3103 to pass. We need our old growth and mature forests for carbon sequestration, clean water, air, fish habitat, recreation and all the important mycelium and forest duff for healthy forests. Thinning some forests is permissible, but no clearcutting and spraying. We are running out of time to begin combating climate disruption. Cutting more trees and leaving ground open to run off and toxic spraying will only exacerbate to our emergency. Thank you.
