

Submitter: Ramona Copenhaver

On Behalf Of:

Committee: House Committee On Agriculture, Land Use, Natural
Resources, and Water

Measure, Appointment or Topic: HB3103

House Bill 3103 is a good governance bill that establishes clear, data-backed harvest levels and improves public transparency and predictability around timber harvests on state forestland. Establishing sustainable harvest levels that balance economic and environmental priorities will serve Oregonians now and into the future. Aligning timber sales with sustainable harvest levels will support local economies and timber-dependent communities as well as state revenue goals. I urge the Legislature to pass this bill to better Oregon timber harvest management and ensure the continuation of Oregon small businesses in the timber and lumber industry.
