

Submitter: Bunny Johnson

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2679

there is a bad chemical called neonicotinoids it is very dangerous and it hurts plants, bees, butterflies and other pollinators you may think it is only bad for the plants and animals but if our bees went away we would not be able to get honey but also without pollinators it would effect our food source so we should get rid of it please banned it and save our natural and animals
