On Behalf Of:

Committee: House Committee On Agriculture, Land Use, Natural
Resources, and Water

Measure, Appointment or Topic: HB3103

For too long the forest industry has destroyed aquatic habitat to maximize timber industry profits. It has stood by as clearcut runoff has filled spawning gravel with mud, effectively destroying sustainable steelhead and salmon populations. While timber production is important to Oregon's economy, it must be reigned in to protect the equal importance of the pristine aquatic habitat that Oregon residents demand.
