Committee:

Joint Committee On Transportation

Measure, Appointment or Topic:

HB3362

I am a nurse in a rural community and adamantly oppose this tax. We have a critical access hospital serving a large area. Public transportation and other alternatives are unavailable to most of the area served. This tax will impose a huge burden on an already underserved population. Please do not further jeopardize access to critical care. This will divert funds from rural areas to already efficient city public transportation.
