

Submitter: Teresa Erskine

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

It is unfair to generate funds in this way. More importantly, people will wait longer to replace their tires than they would otherwise to escape this extra tax burden. The result? More traffic crashes, more expense to the government in law enforcement hours and equipment. Not to mention health and safety and more expense to auto insurers. Please think this through. I don't have the education that many of you have, but if I can see this bill is , as the say, an accident waiting to happen, surely you can, too. Scrap this bill, not the cars, and go back to the drawing board. Thank you.
