

Submitter: Kathleen Boylan

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB2410

Please do not support and vote no on bill HB 2410. It's been 45 years since passage of a ballot measure by the people of Oregon precluding construction of nuclear facilities until a safe mechanism for disposing of nuclear waste has been developed. There is still no safe storage facility for nuclear waste. This bill is totally irresponsible.

SMNR'S are unproven technology. They are too expensive and take too long to build as our climate crisis intensifies. Funds would be spent on viable, proven low impact sources like wind and solar that can be developed in a timely fashion at less cost.

Respectfully,  
Kathleen Boylan
