Committee: House Committee On Rules

Measure, Appointment or Topic: HB3012

Studies have long shown that the prefrontal cortex of the human brain is not fully developed until a person reaches the age of 25. Students need to concentrate on learning as opposed to being targeted by left wing groups over which candidates to vote for. The law says an individual is not to vote until the age of 18. I see absolutely no reason to start making an exception for 16 and 17-year-olds now.
