

Submitter: Leslie Schockner

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

I write in support of HB3362 since recent studies show that tires are a major source of pollution to the environment - more even than exhaust from vehicles. See this article from The Guardian - <https://www.theguardian.com/environment/2022/jun/03/car-tyres-produce-more-particle-pollution-than-exhausts-tests-show> . It is prudent for Oregon to pass this legislation to provide funds to mitigate this pollution by funding environmental projects that counter the ill effects of tire pollution. Likewise, it makes sense to use some of those funds to support transit projects that can reduce our needs, as citizens, to have to drive cars everywhere to conduct the basic activities of our lives. Please pass this legislation.
