

Submitter: Ann Nagle
On Behalf Of:
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3362

I oppose HB 3362 as it burdens Oregonians with yet another tax for a state department that has a long history of misusing and allocating funds. This is most egregious because it not only adds an added expense for consumers but targets a product that is essential for maintaining the safety of a vehicle. Adding this additional tax will burden already struggling Oregonians and has a high likelihood of impeding vehicles from having safe and reliable tires on their vehicles which could arguably increase vehicle crashes. Odot and the state need to adjust funding and stop adding more taxes to Oregonians for these types of projects/funding.
