

Submitter: James Butterfield

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

It amazes me how government will try to push another Tax on the citizens. Why is it so necessary for you to create new taxes for citizens who are already burdened. So many reports are out about how Oregon is getting too expensive to live, people are moving. Does Government not see these? I'm also amazed how you will tax the tires we buy, and not use this money to fix our crumbling road system. Its going fund rail programs? Its going to fund animal crossings? So many things in this modern world have a toxic effect. We dont chase all of them now do we. If you concentrate enough of anything, even water, its toxic. Please consider NOT pushing this any further. Deny this bill from moving forward.
