

Submitter: Susan Sheggeby

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

As a resident of an area of the state greatly impacted by collisions of motor vehicles with deer and other wildlife, I urge you to pass HB 3362. Not only are these collisions impacting wildlife but also there is a heavy cost in injuries to us and our cars. This is an old and proven concept developed first in France in the 1950's. This seems a reasonable way to fund it here. As we know, federal infrastructure funds for this are now frozen. As we see traffic increase over time, this will surely become an escalating danger to us all.
