

Submitter: Bill Bold

On Behalf Of:

Committee: House Committee On Agriculture, Land Use, Natural
Resources, and Water

Measure, Appointment or Topic: HB3103

There is nothing sustainable about HB3103. The definition of sustainable in the bill says it all. "A planned volume of timber to be sold from available land and harvested thereafter". Maximizing NPV is the sustainable goal, not managing our forest lands for preservation as well as a perpetual source of natural resources. This is nothing more than a grab it all now legislation that uses a few green sounding words to hide its intent.
