

Submitter: David Wall
On Behalf Of: Mr Oregon OPPOSES HB 2299
Committee: House Committee On Judiciary
Measure, Appointment or Topic: HB2299

I OPPOSE [HB 2299].

Artificial Intelligence (AI) can generate entire images of an individual (including body parts and any activity) with just a facial photograph of the victim(s).

I OPPOSE [HB 2299] because the punishments are way too lenient.

The minimum fine should be forfeiture of Defendant's property and NOT an additional measly [\$6,250] or [\$125,000] fine but much, much more.

The mandatory jail time should be [10] to [20] years and not a 'five-year' junket.

Defendant should be required to register as a "sex offender."

The civil fines should be exceptionally draconian, designed to hurt, punish and deter.

***The victims will suffer for the rest of their lives, and is very unlikely the victim(s) will never be made 'whole' to live normal lives.

As far as punishing Juveniles who commit these heinous crimes...their parents should be made to 'step into the shoes' of Defendant. Depending on the Juvenile's age, treat the offending Juvenile as adults for the Juvenile had 'Scienter' to commit the crimes due to; computer, requisite software and photographic technologies knowledge and how their uses could intentionally cause harm(s).

The stated punishments in [HB 2299] and monetary fines will not extinguish the crimes and harms described in [HB 2299].

David S. Wall
Mr. Oregon Concurr.
