

Submitter: Mary Addams

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure, Appointment or Topic: HB3546

Please support HB 3546 because it can help average ratepayers from subsidizing the large data centers, and cryptocurrencies from draining our electricity. The large consumers don't pay their fair share, just like the wealthiest taxpayers don't pay a fair share of income tax.

These large customers need their own category so that they can be charged for all the extra infrastructure that's required for their needs.
