

Submitter: Anne Zientek
On Behalf Of: On behalf of drivers switching to electric cars
Committee: Joint Committee On Transportation
Measure, Appointment or Topic: HB3362

This is a reasonable way to recover road use funds as electric vehicle use becomes more prevalent and gas vehicles decline. Senator Bruce Starr sent out an email to a giant list of citizens bad mouthing the proposition for no compelling reasons whatsoever. Senator Bruce Starr offers no options or ideas on how to work the slow transition between gas and electric vehicles. It's too bad the legislature is saddled with an arrogant man like Senator Bruce Starr who spends his time bad mouthing others, sending out long "you should be alarmed" emails but offering absolutely no alternative solutions. Thank you to the collaborative voices in the legislature trying to legitimately find solutions for us on keeping our roads safe for people and the environment. I am not a democrat or a republican but am a registered voter.
