On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

I oppose this 4% tax. "Environment" is a catch phrase to cover a multitude of NGO's that will have no oversight as to what projects are taken on or how our tax dollars are actually spent. It doesn't help build or maintain roads or highways which would be more helpful if a new tax was desirable. My city of Salem has just placed a new tax of property owners, I don't need another new tax, this will hurt the middle and even lower middle classes. What about people who drive for a living, like delivery drivers who use their personal cars? Care givers who go house to house? Not fair.
