Measure, Appointment or Topic: SB1003

Please reverse this plunge to societal death. Assisted suicide is not compassion. It does not strengthen our culture, but weakens it further. A former administrator of a nursing home near Salem told me about an elderly woman's family convincing her to end her life. When the time came, the woman protested that she did not want to die. The family prevailed in forcing her to go through with the suicide. No government should allow this.
