

Submitter: Jason Armstrong

On Behalf Of:

Committee: Joint Committee On Transportation

Measure, Appointment or Topic: HB3362

We as Oregonians do not need another tax! We do need to come up with a solid way to fund a Transportation package that helps our roads. This is not a good solution. We need a solid, well balanced budget that is not trying to squeeze the blue collar or small town commuter taxpayer for more and more. I live in Linn county, work for a construction company in Lane County and travel 45 miles each way. Tires already have increased in cost through inflation. This will burden those that struggle financially and put a larger risk for incidents and accidents from running tires past what is recommended due to increased cost. We need funding for good maintained/smooth roads. This tax will not cover that and will place money in areas that do not use tires in the first place. Please do not pass this bill.
